# Charter Application.

Charter Application.

NOTICE IS HEREBY GIVEN THAT AN application will be made to the Governor of Pennsylvania on Thursday, Feb'y 8th, 1891, by Clarence D. Simpson, Thomas H. Watkins, James J. Crawford, Harry P. Simpson and A. F. Law, under the act of assembly, entitled. "An act to provide for the incorporation and regulation of certain corporations," approved April 29th, 1874, and the applements thereto, for the charter of an intended corporation to be called the Forty Fort Coal Company, the character and object of which is mining, preparing for market and selling coal produced from lands of the company held in fee or under lease or otherwise, and for these purposes to have, possess and enjoy all the rights, be relits and privileges of said act of assembly and supplements thereto.

# GENERAL NEWS

Reading Re-organization.

The Authorship of This Plan Is Attributed to John Lowber Welsh, and It is Apparently Meeting with Favor-President Wilbur Is Reelected-Sales Agents Restrict Production-Nova Scotian Coal Men Are Anxiously Watching the Progress of Wilson's Bill-Other News.

The new plan of Reading re-organi zation is follows: The floating indebt edness of the company, including the receivers' certificates, amount in round numbers to \$12,500,000. The Finance company of Pennsylvania has had charge of the coal and coke accounts of the Reading Coal and Iron company for the last fifteen months, and the advances have increased so that they now amount to \$3,000,000 The security in the possession of the Finance company is believed to be sufficient to warrant an issue of \$5,000,000 of 6 per cent, ten year trust certificates, which could be sold to the public at par, and the Fi-nance company has intimated that if this can be done its annual charge for services will be materially reduced after the expiration of the present contract, The 5 per cent, collateral trust bonds, owned by the Reading company amount to \$10,000,000. If they can be disposed of to the security holders and stockholders of the company at a fair price a sufficient amount will be realized to pay off the floating debt and receivers' certificates and to provide money to deal with some of the car trusts which matura soon. It will also be necessary for the general mortgage bon tholders to fund their coupons for five years and it is proposed to form a syndicate to purchase at par for cash, the coupons as they mature, thus giving to the bondholders money for the interest as it falls due, reserving to the bondholders, however, the privilege of tak ing the coupon trust certificates them-selves if so desired. With this relief to the company during the period of funding it will be able to take up all its maturing obligations, including the equipment notes, and have ample means, it is balleved, for conducting its business. At the expiration of five years, under the terms of the last reorganization, the company will come into possession of \$10,000,000 of general Lowber Welsh is credited with devis-

A dispatch from Chester, Pa., says: James C. Fender, vice president of the Keystone Plaster company, of Chester, has just returned from a business trip to Nova Scotia, where his company owns large plaster fields. Mr. Fender says that everywhere evidences may be seen of the great hopes the coal ininers and manufacturers in that section have of getting their products into the United States markets after th-passage of the Wilson bill. At Glass Bay, Mr. Fender saw a large steamer being loaded with coal for the Bosto market, where it can be sold after the duty is paid at the same price as the Pennsylvania coal, and the Cape Breton coal operators declare that with the promised reduction in the duty they can drive the Philadelphia colliers out of the business."

Alluding to the statement of John H inman that if coal were made free, thus taking away the through traffi of many railroads, it is inevitable that the freight loss will be recouped by the raising of local freight rates, the Washington Post says:

No one, we imagine, will deny that free coal will cut down the through close out entirely. If they adopt the lat-ter expedient, untold misery will be en-tailed upon millions of people. If the former, every patron of the railroads will have to contribute to make good the deficit. In either event free coal becomes a costly luxury to the people. In either event it is a blunder.

At a special meeting of the anthracite coal sales agents in New York yesterday it was decided to radically restrict production during the rest of the month. The agents will issue orders to cut down the present allotments to about 50 per cent, thus re-

holders of the Lebign Valley Railroad company was held in Philadelphia yesterday. The members of the pre sent management were all re-elected. No other ticket was placed in the field.

MINOR INDUSTRIAL GLINTS:

The puddling department in Moorheads mill at Sharpsburg, which has been shut down for some repairs, was started on double turn. As soon as repairs are finished the guide mill will also resume oper-

The rolling mill of Chess, Cook & Co., at Rankin, which has been closed for two months, went into operation. The pros-pects for steady operation are not bright A manufacturing comeany is being formed among Homestead business men for the manufacture of a fire trap. The company has selected a site in Homestead,

company has selected a site in Homestead, where it will build.

The employee of the Pittsburg Wire works at Braddock refused to accept a reduction of about 31 per cent, in wages and struck. Five hundred men are affected.

All the miners of the Mercer Coal company and the Westerman company's mines went on a strike because a reduction of 12. went on a strike because a reduction of 12 cents per ton for block coal took effect. A similar reduction is ordered by the Pina Grove Coal company for today, when their miners will quit work.
